SpeedFace-V4L Pro   SpeedFace-V4L Pro-QR   SpeedFace-V4L Pro-RFID

The SpeedFace-V4L Pro series uses intelligent engineering facial recognition algorithms and the latest computer vision technology, featuring a video intercom function.

What sets the SpeedFace-V4L Pro apart is its 4-inch color LCD touch screen, a 2MP binocular camera, a built-in microphone, and a speaker for two-way video communication. There are two ways to use video intercom functions. Firstly, users can have a video phone through the ZKBio Zlink or ZKBio Zexus app. Secondly, the terminal can connect the indoor station via SIP protocol.

The SpeedFace-V4L Pro series can also integrate with the ZKBio Zexus to support Dynamic QR codes for access control or time and attendance protocols. Furthermore, the SpeedFace-V4L Pro series incorporates the ultimate anti-spoofing algorithm for facial recognition, protecting most fake photos and video attacks.

Features

• Visible light facial recognition technology and in-glass fingerprint verification.

• Visible light facial recognition in dimly lit environment even without supplement light.

• Full spectrum of authentication methods: support facial authentication/ fingerprint authentication/ palm authentication/ scramble QR code/ card/ password (Virtual Keypad)

• Supports multiple RFID modules: 125 kHz ID card / 13.56MHz IC card / ID & IC card.

• Enlarged Capacity: 6,000(facial authentication)/ 6,000(fingerprint)/ 3,000(palm)/ 10,000(RFID card) / 200,000 transactions

• HD video door phone via ZKBio Zlink or ZKBio Zexus mobile app / indoor monitor.

• Reached IP65 protection rating with waterproof and dustproof.

• Compatible with wired doorbell and wireless doorbell (optional).

* Note: Palm authentication is for indoor use only.
